DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

This is a two story brick building detached on the right side. It was apparently built as a Federal style townhouse but later converted to an additional waiting room, etc., by the B & O R.R. It is three short bays wide and three regular bays deep with an older building to the rear used as a wing in an "L" shape newer attachment. This wing is 1-1/2 stories high, two bays long and one bay wide with a one bay square extension. The front section no longer has a rear balcony. All brickwork is of common bond.

The doorway occupies the left bay with an overlight above the door and framed by fluted pilasters. An added pentroof cornice covers this doorway and the adjoining shop type window to the right. The building is reached by a four step porch with an iron railing.

The second floor front windows are of 1/1 sash with flat brick arches and wood sills. The older wing is lighted by 6/6 sash on the first floor and 4/4 wood case-ment "eyebrow" type windows on the top floor. Windows are headed by flat brick arches on the first floor and wood lin-
tels on the second floor. Rear section doors are paneled.

The front section roof is of a low slope "A" frame metal type with enclosed chimneys on either side of the gable on the right wall. The wing has a metal shed roof with a small chimney on the end. The front roofline is decorated by a molded cornice with modillion dentil trim, and cast iron lion heads protruding on either end.

The building rests on a fairly high fieldstone foundation. The first floor of the wing had been used as a holding baggage room by the railroad and the upstairs for employee sleeping accomodations.
